Fast, effective and long lasting change

I work with my clients in a holistic way, treating a wide range of issues from anxiety, depression, fear of failure and phobia to coaching clients in performance techniques, goal setting and motivation strategies. My aim is always to get you back in tune with your true self as quickly as possible.

Neuro-Linguistic Programming (NLP) tools help facilitate conversations between client and coach that bring about positive change, giving new intellectual perspectives, understanding and strategies which are applicable to life and business.

Hypnosis, Time Line Therapy™ & The Rewind Technique® work therapeutically to let go of past traumas and allow you to heal emotional pain. Hypnotherapy helps to change behaviour at the subconscious level so that you can do what you want to do.

Energy Codes® Coaching works with the raw energies beneath your personal history, assisting clients who wish to open more fully to the connections between mind, body, heart and spirit.

Performance Coaching helps those in high stakes situations to deliver their best when working under pressure.

EMPOWER YOUR MIND

NEURO LINGUISTIC PROGRAMMING

Neuro - meaning how the brain works and the ways in which we filter information to give it meaning.

Linguistic - the language we use to communicate with each other.

Programming - how we use that knowledge to create strategies for living life

NLP (Neuro-Linguistic Programming) Coaching

NLP is the study of the relationship between the mind, body, emotions and actions. The tools of NLP help to facilitate a conversation between client and coach that brings about quick, effective and long-lasting changes that can have a positive impact on issues around exam stress, decision-making, goal setting, learning strategies and business planning, as well as providing therapeutic change for depression, anxiety, phobia & much more.

You will find the coaching sessions different to counselling in so far as we will spend a minimal amount of time talking about your problem. Instead, we gather information about the problem and then spend time discovering the internal thought process of HOW the problem is created in your neurology. By discovering the structure and changing your strategy for the problem, it means that together, we can move on and focus on having the problem disappear very quickly, giving you that feeling of instant relief as you learn to change the thought patterns which control your behaviour. When we work with your issues in this way, we can rapidly alleviate the symptoms of stress and you can see your own way to previously unthought of possibilities. It is truly an empowering process which gives you the tools to live your life better.

Hypnosis & Time Line Therapy™

Hypnosis and Time Line Therapy™ work therapeutically to let go of past traumas and allow you to heal emotional pain. Hypnotherapy helps to update old unconsciously held beliefs and change behaviour at the subconscious level so that you can do what you want to do. Time Line Therapy™ is a process of imagination used as a technique for rehearsing positive future outcomes, as well as a tool that enables you to let go of unprocessed emotions surrounding past events.

Hypnosis quiets the analytical mind and allows us to safely access the unconscious through the REM (or dreaming) state. During a session you will be guided into a state of relaxation which feels like that comfortable state between sleeping and waking, where you are consciously aware of your surroundings and in control of your responses, whilst your body is feeling very relaxed.

Whilst deeply relaxed, you are able to access the observing state to find new ways of thinking through the resources you hold in your unconscious; opening lines of communication to help you to resolve problems, habits and negative emotions. In this way we can update the unconscious patterns which are currently compelling you to behave in a way that is unhelpful to you. Hypnotherapy is a gentle empowering process, which enables you to take back control of your life and focus on how things can change in the future.

The Rewind Technique® for Trauma (PTSD) & Phobia

The Rewind Technique® is a powerful process that enables the safe and gentle treatment of trauma; de-traumatising bad memories without the need to relive them, stopping flashbacks and other symptoms of Post-Traumatic Stress Disorder. It works by unhooking the negative feelings from the traumatic memory, calming down the emotional arousal so that there is no longer any trigger that activates the flight/fight response. This technique is also an effective treatment for people suffering from depression, anxiety and phobias such as fear of specific animals, fear of flying and fear of medical interventions.

Do you feel stuck? Have you ever wondered how other people breeze through life and thought “why not me”?

Life Coaching

Life coaching uses therapeutic tools to enable you to let go of past traumas and heal emotional pain so you can change behaviour at the subconscious level. It allows you to ditch the heavy baggage so that you can move forward and live life with ease. By working together utilising the tools within NLP and/or hypnosis, we can bring about effective, lasting change for anxiety, phobias, stress, depression, fear of failure, lack of motivation, weight control & more.

As you let go of old patterns of behaviour and gain an understanding of how the brain works, it opens you to new thinking, new perspectives and new solutions, enabling your personal growth and expanding development.
